Town Board Report for 07/20/2020

- 1. We received our Annual Certificate of jurisdiction miles. It was unchanged from last year at 18.115 miles.*
- 2. Matt Turner has completed his new hire probationary period. I have had zero incidents with Mr. Turner and he has shown great work ethic. He should make the Town of Spencer a great employee for a long time to come.*
- 3. I have kept in contact with Shannon Brock from Milestone. Work should be getting underway very soon on the Community Crossing Pavement Project.*
- 4. The Towns new EGIS mapping service is up and running. We still have a few bugs to work out before it is completely ready. The new on-line citizen problem reporter should be able to be released to the public sometime soon.*
- 5. In reference to the rough/sunken manholes in the westbound lane of Morgan St. I contacted INDOT to see about getting repairs made to these. On several different occasions the lids have been “flipped” off by trucks hitting them creating a very dangerous situation for motorist. INDOT responded back quoting an IC Code (8-23-6-3) saying these were the responsibility of the town to maintain. I have looked up this IC code and couldn’t find anything that said as much. I disagree that these are the towns responsibility. With that being said I do believe with one load of hotmix (about \$200) and half a day’s work my crew can make westbound Morgan street a much better driving experience. I question the board on if they request I continue to get the state to make said repairs or just preform the needed work inhouse by my crew at the towns expense?*

*Thank you,
Tony R Floyd*
